according to Regulation (EC) No. 1907/2006, as amended by Commission Regulation (EU) 2020/878

Commercial Product Name: ALEXIT BR12H0-BladeRep Hardener 12 Quality No.: 4053D0000000

Revision Date 12.03.2025 Print Date 12.03.2025 Version 5

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

Trade name

: ALEXIT BR12H0-BladeRep Hardener 12 farblos / transparent

1.2 Relevant identified uses of the substance or mixture and uses advised against

- Use of the Substance/Mixture
- : Industrial serial painting

1.3 Details of the supplier of the safety data sheet

Mankiewicz Gebr. & Co. (GmbH & Co. KG) Georg-Wilhelm-Strasse 189 21107 Hamburg Germany

Only for UK:

Supplied by Mankiewicz UK LLP 26 Ashville Way, Whetstone, Leicester LE8 6NU United Kingdom

Telephone	+49 (0) 40 75103 0
E-mail address of person	sdb_info@umco.de
responsible for the SDS	

1.4 Emergency telephone number

Emergency telephone num-: +44 1865 407333 (NCEC) ber

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Classification (REGULATION (EC) No 1272/2008)

Flammable liquids, Category 3	H226: Flammable liquid and vapour.
Acute toxicity, Category 4	H332: Harmful if inhaled.
Skin sensitisation, Category 1	H317: May cause an allergic skin reaction.
Specific target organ toxicity - single ex- posure, Category 3, Central nervous system	H336: May cause drowsiness or dizziness.
.	

Specific target organ toxicity - single exposure, Category 3, Respiratory system

H335: May cause respiratory irritation.

Bank Deutsche Bank HypoVereinsbank

according to Regulation (EC) No. 1907/2006, as amended by Commission Regulation (EU) 2020/878

Commercial Product Name: ALEXIT BR12H0-BladeRep Hardener 12 Quality No.: 4053D00000000

2.2 Label elements

Labelling (REGULATION (Hazard pictograms	EC) :	No 1272/200	
Signal word	:	Warning	
Hazard statements	:	H226 H317 H332 H335 H336	Flammable liquid and vapour. May cause an allergic skin reaction. Harmful if inhaled. May cause respiratory irritation. May cause drowsiness or dizziness.
Supplemental Hazard Statements	:	EUH066	Repeated exposure may cause skin dryness or cracking.
Precautionary statements	:	Prevention	
		P210 P261 P280	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid breathing mist or vapours. Wear protective gloves/ protective clothing/ eye
		1 200	protection/ face protection.
		Response:	
		P303 + P36	61 + P353 IF ON SKIN (or hair): Take off immedi- ately all contaminated clothing. Rinse skin with water.
		P304 + P34	40 + P312 IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER/ doctor if you feel unwell.
		P370 + P37	•

Hazardous components which must be listed on the label:

Hexamethylene diisocyanate, oligomers n-butyl acetate

Additional Labelling

"As from 24 August 2023 adequate training is required before industrial or professional use."

2.3 Other hazards

This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.

Ecological information: This substance/mixture does not contain components considered to have endocrine disrupting properties for environment according to UK REACH Article 57(f).

	If unconscious place in recovery position advice.	on and seek medical
In case of skin contact :	Take off all contaminated clothing imm Wash skin thoroughly with soap and w skin cleanser. Do NOT use solvents or thinners !	
In case of eye contact :	Remove contact lenses, irrigate copiou water for at least 10 minutes, holding the seek medical advice.	
If swallowed :	Do NOT induce vomiting.	

If accidentally swallowed obtain immediate medical attention. Never give anything by mouth to an unconscious person. Keep at rest.

4.2 Most important symptoms and effects, both acute and delayed

Risks	: May cause an allergic skin reaction. Harmful if inhaled.
	May cause respiratory irritation.
	May cause drowsiness or dizziness.
	Repeated exposure may cause skin dryness or cracking.

4.3 Indication of any immediate medical attention and special treatment needed

No data available

SECTION 5: Firefighting measures

5.1 Extinguishing media Suitable extinguishing media	:	Alcohol resistant foam, CO2, powders
Unsuitable extinguishing media	:	High volume water jet
5.2 Special hazards arising from Specific hazards during fire- fighting		e substance or mixture Fire will produce dense black smoke. Exposure to decomposi- tion products may cause a health hazard.
5.3 Advice for firefighters Special protective equipment for firefighters	:	Appropriate breathing apparatus may be required.
Further information	:	Cool endangered containers with water in case of fire. DO NOT ALLOW RUN-OFF FROM FIRE FIGHTING TO ENTER DRAINS OR WATER COURSES!!

according to Regulation (EC) No. 1907/2006, as amended by Commission Regulation (EU) 2020/878

Commercial Product Name: ALEXIT BR12H0-BladeRep Hardener 12 Quality No.: 4053D0000000 Revision Date 12.03.2025 Print Date 12.03.2025 Version 5

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Personal precautions	 Exclude sources of ignition and ventilate the area. Do not inhale vapours. Refer to protective measures listed in sections 7 and 8. Immediately clean contaminated areas with following sub- stances: 		
	Water	45 Vol.%	
	Ethanol or Isopropyl Alcohol	50 Vol.%	
	Ammonia solution (density=0,88)	5 Vol.%	
	Alternative applicable to that (not flar	nmable):	
	Sodium Carbonate	5 Vol.%	
	Water	95 Vol.%	
6.2 Environmental precautions			

Environmental precautions	: Do not let product enter drains. If the product contaminates lakes, rivers or sewage, inform appropriate authorities in accordance with local regulations. Add the same decontaminant to the remnants and let stand for several days until no further reaction in non-sealed con- tainer. Once this stage is reached, close container and dis- pose according to local regulations.
---------------------------	---

6.3 Methods and material for containment and cleaning up

Methods for cleaning up	 Contain and collect spillage with non-combustible absorbent materials, e.g. sand, earth, vermiculite, diatomaceous earth and place in container for disposal according to local regula- tions (see chapter 13). Clean preferably with a detergent; avoid use of solvents.

6.4 Reference to other sections

For personal protection see section 8.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Advice on safe handling	:	Persons with a history of asthma, allergies, chronic or recur- rent respiratory disease should not be employed in any pro- cess in which this preparation is used ! Prevent the creation of flammable or explosive concentrations of vapour in air and avoid vapour concentrations higher than the occupational exposure limits. Comply with the health and safety at work laws. Smoking, eating and drinking should be prohibited in the ap- plication area.
Advice on protection against	:	The product should only be used in areas from which all na-

Advice on protection against	:	The product should only be used in areas from which all na-
fire and explosion		ked lights and other sources of ignition have been excluded.

Revision Date 12.03.2025 Print Date 12.03.2025 Version 5

Preparation may charge electrostatically: always use earthing leads whentransferring from one container to another. Operators should wear anti-static footwear and clothing. No sparking tools should be used. Vapours are heavier than air and may spread along floors. Vapours may form explosive mixtures with air.

7.2 Conditions for safe storage, including any incompatibilities

Requirements for storage areas and containers	:	Electrical equipment should be protected to the appropriate standard. Floors should be of the conducting type. Keep con- tainer tightly closed. Never use pressure to empty: container isnot a pressure vessel. No smoking. Prevent unauthorized access. Containers which are opened must be carefully re- sealed and kept upright to prevent leakage.
Further information on stor- age conditions	:	Always keep in containers of same material as the original one. See also instructions on the label. Avoid heating and direct sunlight. Keep container dry in a cool, well-ventilated place. Precautions should be taken to minimise exposure to atmospheric humidityor water: CO2 will be formed which in closed containers can result in pressurisation.
Advice on common storage	:	Keep away from oxidizing agents and strongly acid or alkaline materials.
Recommended storage tem- perature	:	5 - 35 °C

7.3 Specific end use(s)

Specific use(s)

: This information is not available.

	should be distinguished from substances which may trigger the symptoms of asthma in people with pre-existing airway hyper-responsiveness, but which do not include the disease themselves. The latter substances are not classified as asthmagens or respiratory sensitisers. Further information can be found in the HSE publication Asthmagen? Critical assessments of the evidence for agents implicated in occupational asthma., Wherever it is reasonably practicable, exposure to substances that can cause occupational asthma should be prevented. Where this is not possible, the primary aim is to apply adequate standards of control to prevent workers from becoming hyper-responsive. For substances that can cause occupational asthma, COSHH requires that exposure be reduced to as low as is reasonably practicable. Activities giving rise to short-term peak concentrations should receive particular attention when risk management is being considered. Health surveillance is appropriate for all employees exposed or liable to be exposed to a substance which may cause occupational asthma and there should be appropriate consultation with an occupational health professional over the degree of risk and level of surveillance., Capable of causing occupational asthma., The 'Sen' notation in the list of WELs has been assigned only to those substances which may cause occupational asthma in the categories shown in Table 1. It should be remembered that other substances not in these tables may cause occupational asthma. HSE's asthma web pages (www.hse.gov.uk/asthma) provide further information.

8.2 Exposure controls

Engineering measures

Provide adequate ventilation. Where reasonably practicable this shoud be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates and below the OEL (= Occupational Exposure Limit), suitable respiratory protection must be worn.

Personal protective equipment

Eye/face protection	:	Wear safety goggles to protect against solvent splashes.				
Hand protection						
Remarks	:	Adhere to the professional organisation rule "Use of protec- tive gloves". Appropriate chemicals resistant glove tested in compliance with EN 374. Recommendation for protection against components general- ly found in the products:				
		For short-term contact (i.e. splash protection): Appropriate material: nitrile rubber, Neoprene Material thickness: > 0,4 mm Breakthrough time: > 480 min				
		Before use, the protective glove should be tested in any case for its specific work-station suitability (i.e. mechanical re- sistance, product compatibility and antistatic properties). Ad- here to the manufacturer's instructions and information relat- ing to the use, storage, care and replacement of protective gloves. Protective gloves shall be replaced immediately when physically damaged or worn. Preventive hand protection (skin protection cream) recommended. Wash immediately contam- inated skin. Design operations thus to avoid permanent use of protective gloves.				
Skin and body protection	:	Depending on the probability of the occurrence of dangerous- ly explosive atmospheres, adapted protective clothing must be worn.				
Respiratory protection	:	By spraying: air-fed respirator. By other operations than spraying: in well ventilated are- as, air-fed respirators could be replaced by a combination of charcoal filter andparticulate filter mask Use half-mask model with cartridge or air-fed.

	Version 5

Solubility(ies) Water solubility	: insoluble	
Vapour pressure	: ca. 100 hPa (50 °C)	
Density	: ca. 1.06 g/cm3 (20 °C)	
Relative vapour density	: No data available	
9.2 Other information Flammability (liquids)	: No data available	
Miscibility with water	: immiscible	
Solvent separation	: < 3 %(V)	

SECTION 10: Stability and reactivity

10.1 Reactivity

No decomposition if stored and applied as directed.

10.2 Chemical stability

Stable under normal conditions.

10.3 Possibility of hazardous reactions

Hazardous reactions	No dangerous reaction known under conditions of normal use. There are no data available on the preparation itself.
10.4 Conditions to avoid	
Conditions to avoid	Stable under recommended storage and handling conditions (See section 7).
10.5 Incompatible materials	
Materials to avoid	Keep away from oxidizing agents, strongly alkaline and strongly acid materials in order to avoid exothermic reactions. The product reacts slowly with water resulting in evolution of carbon dioxide. In closed containers, pressure build up could result distortion blowing and in extreme cases bursting of the container.

according to Regulation (EC) No. 1907/2006, as amended by Commission Regulation (EU) 2020/878

10.6 Hazardous decomposition products

In a fire, hazardous decomposition products, such as smoke, carbon monoxide, carbon dioxiode, oxides of nitrogen, hydrogen cyanide, monomers of isocyanates, amines and alcohols may be produced.

SECTION 11: Toxicological information

11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

Acute toxicity

Harmful if inhaled.

Product:

Assessment: The substance/mixture is not toxic on inhalation Acute inhalation toxicity • as defined by dangerous goods regulations.

> Acute toxicity estimate: 14.67 mg/l Exposure time: 4 h Test atmosphere: vapour Method: Calculation method

Components:

Hexamethylene diisocyanate, oligomers:

Acute inhalation toxicity Assessment: The substance/mixture is not toxic on inhalation : as defined by dangerous goods regulations.

Skin corrosion/irritation

Repeated exposure may cause skin dryness or cracking.

Serious eye damage/eye irritation

Not classified due to lack of data.

Respiratory or skin sensitisation

Skin sensitisation

May cause an allergic skin reaction.

Respiratory sensitisation

Not classified due to lack of data.

Components:

Hexamethylene diisocyanate, oligomers:

Species	:	Mouse
Assessment	:	May cause sensitisation by skin contact.
Method	:	OECD Test Guideline 429

Germ cell mutagenicity

Not classified due to lack of data.

Carcinogenicity

Not classified due to lack of data.

Not classified due to lack of data.

Endocrine disrupting properties

11.2 Information on other hazards

Endocrine disrupting properties				
Product:				
Assessment :	The substance/mixture does not contain components consid- ered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.			
Assessment :	This substance/mixture does not contain components consid- ered to have endocrine disrupting properties for human health according to UK REACH Article 57(f),			
Further information				
Product:				
Remarks :	Exposure of vapour concentration in excess of the stated OEL's may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse ef- fects on kidney, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue muscular weakness, drowsiness and in extrem cases, loss of con- sciousness. Repeated or prolonged contact with the preparation may cause removal of natural fat from the skin resulting in non- allergic contact dermatitis and absorption through the skin. The liquid splashed in the eyes may cause irritation and re- versible damage. Based on the properties of the isocyanate components and considering toxicological data on similar preparations: This preparation may cause acute irritation and/or sensitization of the respiratory system leading to an asthmatic condition, wheeziness and a thightness of the chest. Sensitized persons may subsequently show asthmatic symptoms when exposed
